Subject: RE: West Lake landfill & Coldwater Creek

Chris, I spoke with Amer and Mary this morning regarding this request from Senator Chappelle-Nadal. Amer is going to check with the Corps for existing records that we can direct her staffer to in response. As for West Lake, the Admin Record contains documents like the RI/FS/SFS, etc. for which we can also direct them. Newer documents are posted on our website and we can develop a list for her staff to reference. We are not obligated to develop any report as the staffer has requested. As her drop need is January 5, I think we can simply put together a quick list of docs for her staff to review, maybe by next week. Let's look for some time to discuss early next week if you are in. Thanks,

Bradley Vann - Remedial Project Manager

Thanks, Brad.

If a response is prepared while I'm out of the office (Dec. 21 - 31), please coordinate with Chris Whitley or Angela Brees to reply to Ron Berry.

Thank you LaTonya. Copying Amer as he is RPM on Coldwater Creek but it is FUSRAP, so will likely need to coordinate our response with them. Copying other for awareness. Definitely will cue up per call today for response before their January 5 session need.

Importance: High

Hi Brad,

See the questions below.

Thanks.

Subject: West Lake landfill & Coldwater Creek

Latonya,

Thank you for your call this morning. As I mentioned during the telephone call, I am assisting Senator Nadal with some research on the West Lake Landfill and the Coldwater Creek area. Specifically, she would like to establish timelines of when the EPA or NRC first recorded contaminants at these two locations and the measurement that was recorded. The timeline would include all recordings to the present.

For example; elements in the landfills and/or Coldwater Creek:

1974: uranium 235, thorium 230

1986: uranium 238

The above information is simply an example for the years, elements and levels as this information is not factual.

Is this information that the EPA may have or would your office be able to generate a report with this information?
